(+66)96-734-9476 | apisitthaweboon@gmail.com | Bangkok, Thailand | github.com/Yayawak

SUMMARY

Software Engineer with 4+ years of experience building production-grade web, mobile, and cloud-native applications. Specialized in Go, Flutter, React/Next.js, Node.js, and Java, with hands-on experience designing scalable backend services, REST APIs, WebSockets, cloud infrastructure, CI/CD pipelines, and AI-integrated platforms. Built systems ranging from payment-enabled marketplaces and business platforms to location-based social applications serving real-world users. Open to remote Software Engineer and Full Stack Engineer opportunities.

EDUCATION

KMITL University, Thailand

Bachelor of Science

Aug 2022 - April 2026

Major in Computer Science

Cumulative GPA: 3.46 / 4.0; Second Class Honours

Relevant Coursework: Software Engineering, Business Analysis, Data structures and Algorithms, Database Systems

WORK EXPERIENCE

Freelance Software Engineer

2022 - Present

Delivered custom web application development projects for small businesses and individual clients.

- **Deekub - Location Based Social Platform**

- Designed and developed a location-based social platform connecting nightlife venues across Bangkok into a single mobile application.
- Built scalable backend services using Go with clean architecture and dependency injection.
- Developed the cross-platform mobile application with Flutter.
- Implemented real-time messaging, venue check-ins, user discovery, and social networking features.
- Designed RESTful APIs, authentication, media storage, and notification services.
- Established CI/CD pipelines and automated deployments for backend and mobile applications.
- Containerized services with Docker and deployed cloud-native infrastructure.
- Participated in system architecture, database design, and performance optimization for future scalability.

- **Marketplace Website**

- Built a full-stack marketplace platform for digital goods and gaming services, handling concurrent order processing with transactional consistency across MySQL and Redis-backed caching.
- Developed a full-stack marketplace platform for virtual goods and gaming-related services using React.js, Express.js, MySQL, and Redis.
- Designed scalable backend architecture supporting concurrent order processing and transactional consistency.
- Integrated payment gateways, user verification systems, and third-party service providers.
- Implemented order management, administrative dashboards, and security controls based on OWASP best practices.

- **Image Generation Website**

- Developed an AI Image Generation web application that allows users to input text prompts and select image styles to generate customized AI-generated artwork.
- Built the frontend using Next.js and implemented backend integration with the ChatGPT Sora API to process image generation requests and return generated images in real time.
- Designed and developed core system features including user authentication, credit management for generation usage, an admin dashboard, and MySQL database management for user and transaction data.

SKILLS

Technical Skills: RESTful APIs, Concurrent Programming, Optimization, Micro-services, Database Design, System Design, Authentication & Authorization, Cyber Security

Frontend: Flutter, React.js, Next.js, Vue.js, Node.js, Tailwind, Bootstrap, MaterialUI, SvelteKit

Backend: Java Spring Boot, Node.js, ORM, WebSocket, RabbitMQ, Redis

Programming Languages: Golang, Java, Python, TypeScript, JavaScript, Kotlin, Dart, Shell, SQL

Database: PostgreSQL, MySQL, SQLite, MongoDB

DevOps & Cloud: Docker, Docker Compose, Git, CI/CD, Linux, Nginx, DigitalOcean, Cloud Deployment, Server Administration

Development Tools: VS Code, Xcode, Vim, Postman, Swagger/OpenAPI, GitHub

Languages: Native Thai, Fluent English

Soft Skills: Teamwork, Leadership, Problem Solving, Research, Communication, Time Management, Adaptability, Punctuality
